IceStone Care & Maintenance Schedule: Commercial Installations
Provided by: IceStone, LLC

1. Upon architectural specification IceStone® durable surfaces will be fabricated and installed by a Certified IceStone Fabricator in accordance with procedures detailed in **IceStone Fabrication Guidelines**.

2. Installed IceStone durable surfaces will be sealed with one of the following penetrating sealers:

DuPont StoneTech Professional BulletProof Stone Sealer

3. Selected sealer to be applied following manufacturer's instructions.

4. Installed IceStone durable surfaces will also require the application of **CHENG Concrete Countertop Wax**.

5. IceStone durable surfaces require ongoing care and maintenance including, but not limited to:
- Daily cleaning with **Dupont™ StoneTech® Professional Stone & Tile Cleaner** or **Seventh Generation Natural All Purpose Cleaner (Free & Clear)**
- Weekly application **CHENG Concrete Countertop Polish**
- Quarterly application **CHENG Concrete Countertop Wax**.
- Twice-a-year maintenance complete clean and strip with an acetone wash to include re-application of penetrating sealer and application of concrete wax.
    - *IMPORTANT: Whichever sealer is used initially must continue to be used for each re-application.*

6. Fabricator to provide facility manager with hard copies of IceStone **Care & Maintenance Guidelines.**

7. Facility manager to provide custodial staff with hard copies of IceStone **Care & Maintenance Guidelines**.

8. Contact customerservice@icestoneusa.com with any questions.
