

New IceStone Fabrication Addendum

New IceStone comes pre-treated, eliminating the need to seal the surface. All edges must still be treated with a sealer. We recommend using either the Tenax or StoneTech products to do so. Both sealers will enhance with multiple coats if one coat does not provide acceptable color match.

1. Tenax or StoneTech used on edges will not affect our treatment.
2. Spills must be cleaned up as soon as they happen as with all surfaces.
3. We recommend applying Original Lemon Pledge for added protection.
4. Fabricate the surface as per our Fabrication Guidelines. Clean then rinse with fresh water and dry after fabrication. Acetone can be used to clean grime away from fabrication process.
